## **Annual Water Quality Report Available from Heritage Village Water**

SOUTHURY, Conn., August 26, 2019 – Heritage Village Water Company’s latest water quality report is available to customers and others who consume the water produced by Heritage Village Water. The report summarizes the results of water quality testing done in 2018 and includes information about the company’s water system, and source protection measures. Heritage Village Water works closely with the Connecticut Department of Public Health to ensure that the water it provides to customers meets or is better than state and federal standards for drinking water.

“Heritage Village Water employees are committed to delivering customers... clean, high-quality drinking water. We know water is one of life’s essentials and touches everything we care about,” said Craig J. Patla, Connecticut Water’s vice president, service delivery. “We encourage our customers to read the report so they can see the extensive water quality testing and monitoring that is performed throughout the year and can have confidence in the quality of the water we provided to them.”

Heritage Village Water is part of an organization that tests more than 170,000 samples, or about 400 tests per day in Connecticut. The samples are tested at state certified laboratories for more than 120 potential contaminants and water quality parameters. Heritage Village Water collects and tests water samples before and during the treatment process, and in the distribution system before it reaches a customer’s home. The testing is done at labs certified by the DPH and results are submitted to the DPH’s Drinking Water Division.

The 2018 Water Quality Report is available to all online at [www.heritagevillagewater.com/water-quality](http://www.heritagevillagewater.com/water-quality). A free copy of the water quality report is also available by mail by calling 203-264-8100 between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.
